

Covid-19 Relief for Children

For more than one year, at the beginning of the pandemic, few children were infected. With the proliferation of the Delta Variant, however, there has been a sudden surge in cases among children, even very young children. There are currently about 50 children, aged 1-14, in the Covid-19 Treatment Centre of Peradeniya Children's Hospital. For each child, at least one parent must also be in residence. Unfortunately, many of them are also infected. The medical needs for these patients are provided by the hospital, and major requirements (TVs, a washing machine, a fridge, water filters, electric kettles, clothes racks) have already been donated. However, a lot of social and mental support is still needed, as well as material supplies to keep them comfortable. To this end, the hospital staff is seeking support from individuals and organizations. Below is a list of the supplies which are needed.

1. 2-way audio communication sets (Walkie-talkies)
2. Drawing books and colouring materials
3. Storybooks for various ages (Sinhala and Tamil)
4. Kids' activity books
5. Kids' movies and songs to put on a USB pen
6. Toys for various ages

7. Baby napkins (Pampers)
8. Sanitary napkins for ladies
9. Clothes for kids and adults
10. Bed sheets, pillowcases, and towels
11. Tea bags, sugar, and powdered milk
12. Cups and saucers for parents.
13. Packaged biscuits (For hygienic reasons, we cannot accept other sorts of food)

Donation of items may be delivered to
